

I did a survey of all articles with “climate change” in the title in the past couple of years, and then did a rough breakdown of topics. Although the survey was unscientific, the results were intriguing:

Topic	Number of Articles
<b>Adaptation</b>	
Biodiversity and public lands	11
Governance	5
Public health	1
Water	6
<b>Economics</b>	9
<b>Ethics</b>	10
<b>General</b>	41
<b>Mitigation</b>	
Energy	20
Instrument choice and design	19
Federalism	36
Land use	5
Litigation	29
Offsets	1
<b>Politics</b>	15
