

Just for amusement:

Environmental haiku

On a summer day.

---

Across the hilltops,

Slowly wheeling their white blades,

Stand lines of windmills.

---

A nap in the shade,

Dreaming that new studies make

Fox News fall silent.

---

“Global climate change” -

A long and abstract title

For a world in pain.

---

A beautiful day,

But don't spend your time outside:

High ozone levels!
