

Forgive me for a little boasting about our great student-run environmental law journal, which has just launched a [new website](#) with downloadable content and published a terrific, policy-oriented [issue](#) (together with the Emmett Center) with lessons from state leaders across the country on tackling climate change.

The issue focuses on how states are addressing the climate crisis in light of federalism constraints and opportunities, and what their future role will be or should be in the context of a national climate policy. Congressman Henry Waxman wrote the Foreword, introducing pieces by Governor Jim Doyle of Wisconsin, Mary Nichols and guest blogger Ken Alex of California, and other officials from Arizona, California, Colorado, Connecticut, Illinois, Massachusetts, and New York.

The issue also includes a constitutional analysis of the Regional Greenhouse Gas Initiative by Professor William Funk, as well as student comments on California's SB 375 and on cap-and-trade carbon credits.

Details and links to the pieces below. Enjoy!

[Foreword](#), *Rep. Henry A. Waxman*

[California's Climate Change Program: Lessons for the Nation](#), *Mary D. Nichols*

[Challenges and Opportunities for Regulating Greenhouse Gas Emissions at the State, Regional and Local Level](#), *The Honorable Jim Doyle*

[The Changing Climate of Cooperative Federalism: The Dynamic Role of the States in a National Strategy to Combat Climate Change](#), *Jared Snyder and Jonathan Binder*

[The Role of Illinois and the Midwest in Responding to the Challenges of Climate Change](#), *Douglas Scott*

[A Colorado Perspective: The New Energy Economy](#), *Jim Martin and Ginny Brannon*

[Climate Change Action in Connecticut: Linking Energy, the Environment and the Economy](#), *Paul E. Farrell*

[Massachusetts Takes On Climate Change](#), *Ken Kimmell and Laurie Burt*

[Climate Change Action in Arizona](#), *Steve Owens*

[The Essential Role of State Enforcement in the Brave New World of Greenhouse Gas Emission Limits](#), *Matt Bogoshian and Ken Alex*

[Constitutional Implications of Regional CO2 Cap-and-Trade Programs: The Northeast Regional Greenhouse Gas Initiative as a Case in Point](#), *William Funk*

[SB 375: Promise, Compromise and the New Urban Landscape](#), *John Darakjian*

[Not All Carbon Credits Are Created Equal: The Constitution and the Cost of Regional Cap-and-Trade Market Linkage](#), *Juliet Howland*
