

Emmett Institute Faculty Publications Selected Among Top Five
Articles in Environmental Law in 2018 | 1

Articles by UCLA Law's Ann Carlson and Jim Salzman were selected among the top five articles in environmental law in 2018

Editors of the definitive annual compilation of the most significant scholarly articles in environmental law have selected articles by Emmett Institute faculty members Ann Carlson and Jim Salzman for their 2018 edition. The *Land Use and Environmental Law Review* selects the top five articles each year through a peer review process.

Ann Carlson's [article in UCLA Law Review](#) addresses the Clean Air Act's shortcomings in microclimates with high levels of local air pollution. Jim Salzman's [article](#) (with J.B. Ruhl and Jonathan Remy Nash) in *Minnesota Law Review* considers the relationship between federal agency budgets and environmental quality. Both articles will be published in the latest edition of [Land Use and Environmental Law Review](#), an annual Thomson Reuters/West publication edited by Ruhl and David Callies.

The editors identified more than 300 articles published in 2018 on environmental law issues. Dozens of peer faculty then conducted two rounds of review to arrive at the top five articles to be re-printed.

In addition to selecting articles by Professors Carlson and Salzman for reprinting, the editors also selected, as a finalist candidate, an [article](#) published by Nicholas Bryner in *Idaho Law Review* during his time as an Emmett/Frankel Fellow in Environmental Law and Policy at the Emmett Institute. Bryner's article suggests environmental interests and values justify a substantive canon of construction, a set of ground rules judges rely on in interpreting statutes. Bryner is now assistant professor of law at LSU Law.
